

Supreme Gloss Film

Premium film for laminating offset prints

Supreme Gloss Film, designed for high-speed, one- and two-sided lamination, provides excellent durability and superior adhesion to offset printed applications. A high-gloss finish protects prints while preserving colors and vibrancy. Supreme Gloss meets the highest requirements of professional finishers by providing excellent durability and superior adhesion.

Features and Benefits

Versatility

A strong copolymer adhesive ensures that Supreme Gloss will adhere to a wide range of papers and inks, while its durable polypropylene construction offers superior protection, including acid resistance.

Impact

Choose Supreme Gloss for applications requiring a premium look and feel. Its brilliant surface makes it ideal for finishing

book covers, presentation covers, postcards, bags, packaging and more.

Value

Supreme Gloss is well suited for virtually all offset prints and high-speed laminators. It also features all the benefits of polypropylene films – like clean snapping – to ensure fewer reruns and faster turnaround times.
